SuRi

Why Charter SuRi?

Where luxury abounds and adventure beckons. SuRi is a beautiful yacht, stylishly appointed with your comfort in mind, offering everything you could possibly desire on your private yacht charter vacation.

As one of very few purpose-built luxury yachts in the world, SuRi offers the perfect combination of elegance, comfort, and adventure. A beautiful yacht, stylishly appointed with comfort in mind, offering everything you could possibly desire on your unforgettable dream charter vacation.

From braving treacherous seas as a crabber on popular television show, *Deadliest Catch*, to sailing the South Pacific, SuRi has certainly led an adventurous life. After undergoing over five years of conversions, refits, and a major hull extension, which involved cutting her in two, adding a 36-foot mid-section, then joining her back together, SuRi finally revealed her new 208-foot profile and became the ultimate luxury adventure yacht she is today.

History of the Yacht

SuRi began as a crabber, braving dangerous seas near Alaska's Aleutian Islands on the popular television show, *Deadliest Catch*. After undergoing over 5 years of refits and a major extension, SuRi finally became the 208-foot luxury adventure yacht she is today. The International SeaKeepers Society is proud to be able to welcome SuRi to the DISCOVERY Yacht Fleet.

With an unlimited sense of adventure and a world just waiting to be explored, SuRi and her crew have undertaken many expeditions all over our beautiful blue planet. SuRi's voyages have seen her brave the icy waters of Antarctica, island hop through French Polynesia, marvel at the sparkling coasts of Fiji, explore vibrant South East Asia, and tour down under to Australia and New Zealand.

Technical Specifications

SIZE	208' 0" / 63.4M
YEAR	1978 / 2016
GUESTS	12
STATEROOMS	7
BEDS	6 KING, 1 QUEEN, 4 SINGLE
BUILDER	HALTER MARINE
CREW	20

Support Ocean Conservation At The Next Destination

The International SeaKeepers Society promotes oceanographic research, conservation, and education through direct involvement with the yachting community. Founded in 1998 by a small but distinguished group of yacht owners, the primary focus on programming has evolved from data collection, to today's DISCOVERY Yacht Program.

DISCOVERY Yachts are privately owned vessels. Member yachts, are united with experts and educators in the marine science and oceanography fields to facilitate marine research and education by providing use of these vessels. By matching vessels to program participants and promoting citizen science projects, SeaKeepers accomplishes over 50 at sea programming activities a year. The primary goal is to eliminate the largest expense and often limiting factor in conducting research and educational programs at sea. The secondary goal is to create awareness around critical ocean issues with information generated from these programs that is shared through our multiple communication platforms and media partners.

Additionally, shoreline programming which focuses on beach clean-ups by engaging local communities, has become increasingly important as we face complex issues caused by plastic pollution and contaminants in our oceans.

SeaKeepers Mission

The International SeaKeepers Society promotes oceanographic research, conservation, and education through direct involvement with the yachting community. SeaKeepers enables the yachting community to take full advantage of their unique potential to advance marine sciences and to raise awareness about global ocean issues.

The yachting, sailing, and fishing communities are highly mobile by nature, and thus have a presence throughout the world, which presents unique opportunities for at sea exploration and research. The highly migratory nature of our membership enables the DISCOVERY Yacht Program to perform a variety of programming activities that would be difficult to accomplish with traditional research vessels.

Programming is conducted globally with members in North America, Europe and Asia. Headquartered in Florida, USA, SeaKeepers has a second chapter "SeaKeepers Asia" located in Singapore. Details on all of our programming can be found at WWW.SEAKEEPERS.ORG. We welcome inquiries to get involved by emailing PROGRAMMING@SEAKEEPERS.ORG.
